

Production References

From design, mold, manufacturing, surface treatment to assembly, most of our projects are built in-house.

We have a wide range of processing machines and surface treatment equipment and we can respond quickly and flexibly to the needs of our customers.

Our main production processes:

- CNC
- Alu / Iron casting
- Bending
- Punching
- Plastic injection
- Alu extrusion
- Welding
- Laser cutting etc...

Surface treatment

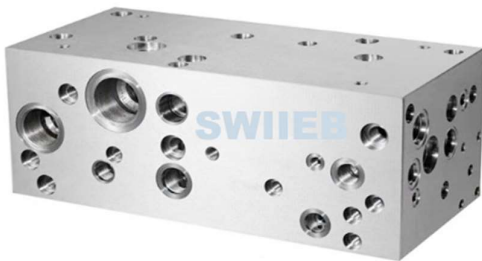

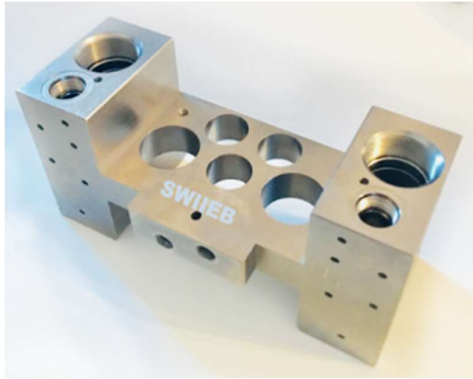

- Powder coating
- Electroplating (chrom / nickel / zinc)
- Anodizing
- Nano
- Passivation etc...
